

Selection By Label

Approach	Example	Comment
[] idx'ing	series['label']	slices, callables, boolean masks
.loc[]	series.loc['label']	slices, callables, boolean masks
dot access	series.label	no slice or boolean mask support
.get()	series.get('label')	no slice support; provides default; forgiving

Selection By Position

Approach

Example

Comment

[] idx'ing

`series[0]`

slices, callables,
boolean masks

.iloc[]

`series.iloc[0]`

slices, callables,
boolean masks

dot access

`series.0`

no slice or boolean
mask support

.get()

`series.get(0)`

no slice support;
provides default;
forgiving
