```python
players.duplicated(
    subset=['name', 'age'],
    keep='first')
```

DUPLICATED()

WHAT COUNTS AS A DUPLICATE?

DEFAULT

records with repeating values across *all* columns

CUSTOM

could be changed to a smaller group of attributes using the subset paramter

WHICH IS THE ORIGINAL?

DEFAULT

the first occurrence is marked as the original

CUSTOM

could be changed to "first", "last" or "neither" using the keep parmeter
